I Beau Buick am of the opinion that the PCBU has contravened the WHS legislation relating to:		
Contravention	More information	Was the contravention rectified?
Not maintaining safe systems of work	Workers identified heat as a common hazard and there was no consultation or communication to discuss long-term control measures. Site manager did not have access to hazard reporting on site.	No
Inadequate facilities or access to facilities	Workers reported heat stress during summer which occurred due to inadequate AC. AC was repaired, however workers report it remains ineffective. PCBU reported part of the fix is to run AC overnight, so it is cool in the mornings but less effective as the day goes on. Day of the visit only the store manager and the area manager were on shift. Stated heat was manageable. Site is a drive-through with no enclosed walls/windows leaving workers exposed to the elements.	No
