Variation to an Enforceable Undertaking between the Regulator and AMS Built Pty Ltd accepted on 5/08/2025

The following variation to the Enforceable Undertaking between the Regulator and AMS Built Pty Ltd (the Company) is proposed:

Under **3.4.1**

Current:

The Company will sponsor the provision of WHS training and mentoring to a Landscape Builder by an external WSC.

Provision of this training to a PCBU outside of the traditional building industry will assist to communicate the lessons learnt from the incident more broadly in the building community.

Landscapers undertake significant work at heights (i.e., when building pergolas, trenches etc.) that poses a risk to workers and the recipients of the landscaping services. Therefore, further WHS education and mentoring will result in increased WHS performance that is of benefit to the broader community.

The Company will provide the Regulator with the following (evidence) to demonstrate compliance:

1. Invoice and payment records for the WSC services
2. Copy of the training and mentoring program (or alike) detailing the scope of training and mentoring provided to the landscape builder
3. Signed records confirming the scope of training and mentoring was completed.

Minimum Cost: \$2,000

Timeframe: 24 months from acceptance

Replace:

Due to the recipient of this term transitioning from a career as a Landscape Builder to pursuing a plumbing apprenticeship, the Company will sponsor the recipient to undertake a Certificate III in Plumbing. The Company will contribute \$2,000 toward the cost of this qualification as part of its commitment to supporting the recipient's career development.

The Certificate III in Plumbing consists of a minimum of 58 units, comprising 43 core units and 15 elective units. The core units include key safety components such as Work Safely at Heights, Carry Out WHS Requirements, and Work Safely on Roofs. Completion of Certificate III in Plumbing will enhance WHS performance, delivering benefits to the recipient, the workplace and the broader community.

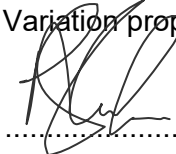

The Company will provide the Regulator with the following (evidence) to demonstrate compliance:

1. Confirmation of enrolment (letter or email)
2. Invoice and payment records for the \$2,000 contribution
3. Evidence of unit completion throughout the duration of the enforceable undertaking.

Minimum Cost: \$2,000

Timeframe: Enrolment into Certificate III in Plumbing must occur within 3 months from the date of variation acceptance.

Variation proposed
