Address:	62-66 RESEARCH ROAD POORAKA SOUTH AUSTRALIA 5095
Date workplace entered:	23/01/2024 12:00:00 AM

I guangzhao Chen am of the opinion that the PCBU has contravened the WHS legislation relating to:		
Contravention	More information	Was the contravention rectified?
Not maintaining safe systems of work	We interviewed 14 workers in the Oven, Packing, Weigh-up, and Mixing areas. 12 of them mentioned feeling excessively hot due to inadequate air conditioning/ventilation, especially those working near the oven. Using a digital thermometer (testo 610), we measured temperatures in various zones: - Oven area: 33°C - Packing area: 31.2°C - Mixing/BVT area: 31.2°C - Weigh-up area: 29.9°C	No
Not maintaining a safe work environment	4 workers informed us about the slippery floor in the Packing area, and at least 1 worker has previously fallen on the floor, resulting in an injury to her forearm.	No
Not maintaining safe plant and structures	We observed a high-pressure air pipe leak in the weigh-up area and promptly informed the technician manager, Neil. Neil acknowledged the	Yes

	issue, mentioning that it is the leading hand's responsibility to report it. However, he assured us that they would address and fix the problem soon.	
Unsafe use, handling and storage of plant, structures and substances	Workers in the mixing area are exposed to an excessive amount of flour dust. Although they wear P2 masks, they told me a fit test is not conducted for the mask they are wearing now. Workers mentioned that they previously used a better mask, but the company declined to change the filter. As a result, they now use a regular P2 mask during their work.	No
