I Anne Purdy am of the opinion that the PCBU has contravened the WHS legislation relating to:		
Contravention	More information	Was the contravention rectified?
Not maintaining a safe work environment	High level of concrete dust in warehouse arising from building construction, of particular concern in freezer. Concrete dust observed on products and near walls. Reported skin and throat irritation in freezer, also 1 worker known allergic reaction. Site Manager indicates water misting in chiller recently resolved. Day workers report no ice observed on floor in cold storage areas of late. Water reported in chiller but resolved of late.	No
Not maintaining safe plant and structures	Pedestrian walkway markings very worn in old dry store. Due for decommissioning in expected 4-6 weeks. Walkway bollards in place in new dry store, but markings not yet painted on floor. New dry store has been in use for approximately 8 weeks.	No

	Recommend immediate prioritisation of walkway markings in new dry store.	
Lack of information, training, instruction or supervision	New racking different in appearance to old which may lead some workers to query weight restrictions. Weight restriction signs observed posted on sides of racking. Recommended to site managers that issue be discussed in toolbox meetings with view to ensure workers are comfortable with understanding new racking and weight limits.	No
