**Variation to an Enforceable Undertaking between the Regulator and Adelaide
Brighton Cement Ltd accepted on 6/09/2023**

The following variation to the Enforceable Undertaking between the Regulator and Adelaide Brighton Cement Ltd is proposed:

Under 3.2.1

Current:

All Adbri Limited sites to hold an additional Toolbox to discuss the incident and learnings. 1,600 employees will be a part of this exercise nationwide. As part of this toolbox, 100% of Adbri Ltd sites will conduct a critical control verification audit for 'Falls from a Height' to ensure critical controls are in place. If non-compliances are identified, action to be raised in Cintellate and tracked to completion. To be completed 6 months from acceptance.

Minimum Cost: \$1,000

Replace:

Remove the critical control verification audit for 'Falls from a height' from EU term 3.2.1 and create an additional EU term in which Adbri commit to undertaking full audits at all Adbri sites against the Working at Heights Group Operating Standard. Identified non-compliances will be raised in Cintellate and rectified. Adbri believe that auditing against the standard will give a better understanding of the level of compliance across all sites and provide for a higher level of safety outcome.

Adbri Limited commit to completing the varied term by 20 July 2024.

To demonstrate compliance Adbri will provide SafeWork SA with evidence of audits at all Adbri sites.

Minimum Cost: \$1000
