*The major hazard facilities are categorised under the following tiers:

tier 1 major hazard facility means a major hazard facility that, in relation to Schedule 15 chemicals that are stored or handled at the facility in a quantity that exceeds 10% of their threshold quantity, only conducts storage, repacking or distribution functions;

tier 2 major hazard facility means a major hazard facility that, in relation to Schedule 15 chemicals that are stored or handled at the facility in a quantity that exceeds 10% of their threshold quantity, processes the Schedule 15 chemicals into other products using processes likely to involve the following: (a) chemical reactions; (b) changes in the state of the Schedule 15 chemicals; (c) operations at high or low temperatures and pressures;

tier 3 major hazard facility means a major hazard facility that, in relation to Schedule 15 chemicals that are stored or handled at the facility in a quantity that exceeds 10% of their threshold quantity, processes the Schedule 15 chemicals into other products using multiple or complex processes at high or low temperatures or pressure.
